

Citizens Energy Savers Can Reduce Your Bottom Line

Citizens Energy Savers provides cash rebates and a Business Customer Incentive program to help your business save money.

Current rebates available to commercial customers for new high efficiency natural gas equipment include:

- **Natural gas boilers** – 25 percent of purchase price up to \$5,000.
- **Boiler modulating burner control (retrofit only)** – 25 percent of purchase price up to \$2,500.
- **Boiler reset control (retrofit only)** -- \$250.
- **Natural gas furnace** -- \$200.
- **Natural gas water heater** -- \$100.
- **Natural gas tank less water heater** -- \$150.
- **Low flow pre-rinse sprayer** -- \$25.
- **Boiler tune-up** -- \$250.
- **Steam trap service** -- \$50 per trap or 50 percent of service cost.

Federal Tax Incentives Available for Commercial Buildings

The federal government offers a tax deduction of up to \$1.80 per square foot to owners or tenants of new or existing commercial buildings that are constructed or reconstructed to save at least 50 percent of the heating, cooling ventilation, water heating and interior lighting energy costs of a building meeting ASHRAE Standard 90.1-2001. Partial deductions of \$.60 per square foot can be taken for qualified improvements in building systems that save energy. For more information on the incentives go to www.energystar.gov.

Business Customer Incentive Program Can Save You Money

Citizens Energy Savers also offers a Business Custom Incentive Program to help business customers make smart, energy efficient decisions that reduce gas consumption and operating costs.

Services include third-party technical and financial assistance for qualifying equipment not covered under the current rebate program. Up to 30 percent of energy project costs may be covered with maximum incentives up to \$25,000.

General Service Heating and Non-Heating Rates D3 and D4 interested in implementing high efficiency natural gas projects that are not covered under the prescriptive rebate program are eligible. To verify your eligibility, please contact the CitizensEnergySavers program Contact Center at (800) 203-1856.

Examples of Eligible Business Custom Projects include:

- Heat recovery projects
- Heating, ventilation and air conditioning (HVAC) and domestic water heating system control projects
- Outside air control
- Insulation
- Infrared heaters

For more information including how to apply, please contact **Mitch Van Cleave**, Citizens Gas Business Custom Program Administrator at: **(866) 344-5777**.

For more information about any Energy Savers Programs, please contact: **Krista Jackson**, Energy Efficiency Portfolio Manager at **(317) 927-4430**.

Citizens Gas is Your Source for Construction Heat

As Fall approaches and temperatures begin to drop, consider using natural gas construction heat to get your projects completed on time. Natural gas is the best and cheapest fuel option for your construction heat applications.

- **Natural gas provides better quality heat with less moisture to speed up the drying process compared with propane and kerosene.**
- **Natural gas is much cheaper to operate than propane or kerosene, up to half the cost of these two fuels.**
- **Natural gas provides your construction heaters with around the clock fuel, eliminating the possibility of running out of fuel in the middle of the night.**
- **Natural gas eliminates the need to continually move the cylinders around the job site.**

Citizens Gas can work with you to provide a list of construction heat vendors who rent heaters by the week, month, and season. If your building doesn't have a service line or meter to the building yet, a Citizens Gas representative can work with you or your contractor to get a service line or meter installed so you can take advantage of this low priced, low hassle method of heating your building.

For more information or to discuss connecting your building for construction heat this winter, please contact **Jason Tuttle** at **(317) 927-4365**.
